“(2) Recent explorations of Lechuguilla Cave at Carlsbad Caverns National Park have provided much new information about the wonders of this cave including the fact that it is the second deepest cave in the United States and contains outstanding world-class cave features such as gypsum crystal chandeliers and gypsum flowers.

“(3) The Lechuguilla Cave has been described by cave researchers as possibly the finest cave in America.

“(4) The interest and excitement of cave researchers throughout the world have been focused on Carlsbad Caverns National Park.

“(5) Cave researchers could use this research institute as an operational base for study of caves in other regions and as a focal point for storage of data on cave geology and speleology.

“(6) The Congress, with the passage of Public Law 100-691, the Federal Cave Resources Protection Act of 1988 [16 U.S.C. 4301 et seq.], recognized the significance of cave resources on Federal lands and established the policy that Federal lands be managed in a manner which protects and maintains, to the extent practicable, significant cave resources.”

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 3741 of this title.

§ 4401. Findings and statement of purpose

(a) Findings

The Congress finds and declares that—

(1) the maintenance of healthy populations of migratory birds in North America is dependent on the protection, restoration, and management of wetland ecosystems and other habitats in Canada, as well as in the United States and Mexico;

(2) wetland ecosystems provide essential and significant habitat for fish, shellfish, and other wildlife of commercial, recreational, scientific, and aesthetic values;

(3) almost 35 per centum of all rare, threatened, and endangered species of animals are dependent on wetland ecosystems;

(4) wetland ecosystems provide substantial flood and storm control values and can obviate the need for expensive manmade control measures;

(5) wetland ecosystems make a significant contribution to water availability and quality, recharging ground water, filtering surface runoff, and providing waste treatment;

(6) wetland ecosystems provide aquatic areas important for recreational and aesthetic purposes;

(7) more than 50 per centum of the original wetlands in the United States alone have been lost;
