

consumers of the Nation. The American consumer requires a continuing supply of quality and affordable flowers and plants as an important element in the quality of life. It is, therefore, declared to be the policy of Congress and the purpose of this chapter that it is essential and in the public interest to authorize the establishment of an orderly procedure for the development and financing, through an adequate assessment, of an effective and coordinated program of research, consumer and producer education, and promotion designed to strengthen the floral industry's position in the marketplace and maintain, develop, and expand markets for flowers, plants, and flowering plants. Nothing in this chapter may be construed to dictate quality standards or provide for control of production or otherwise limit the right of individual flower and plant producers to produce commercial flowers and plants. Nothing in this chapter may be construed as a trade barrier to flowers and plants produced in foreign countries, and this chapter treats foreign producers equitably.
